

AMANDA MCINTOSH

Designer & Developer

HELLO!

Nice to meet you!

I'm 1/2 designer & 1/2 front-end developer.

I create, I optimize, I brainstorm, I critique. I love working on interesting projects with a diverse team.

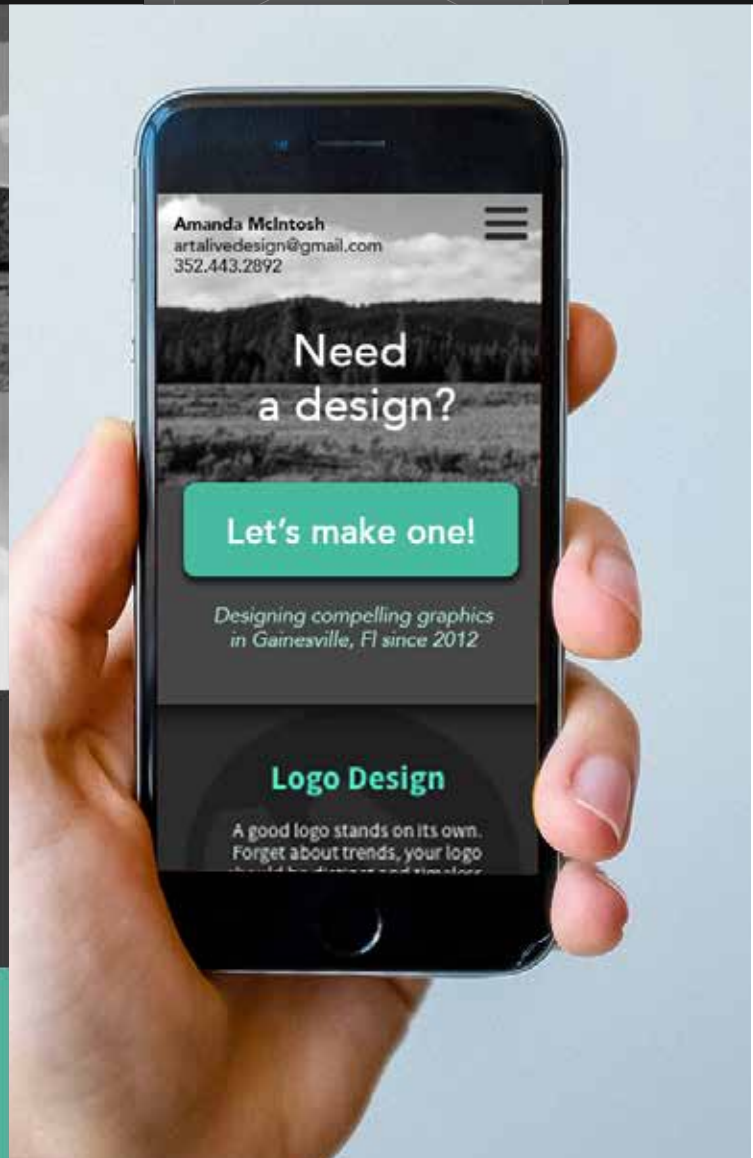

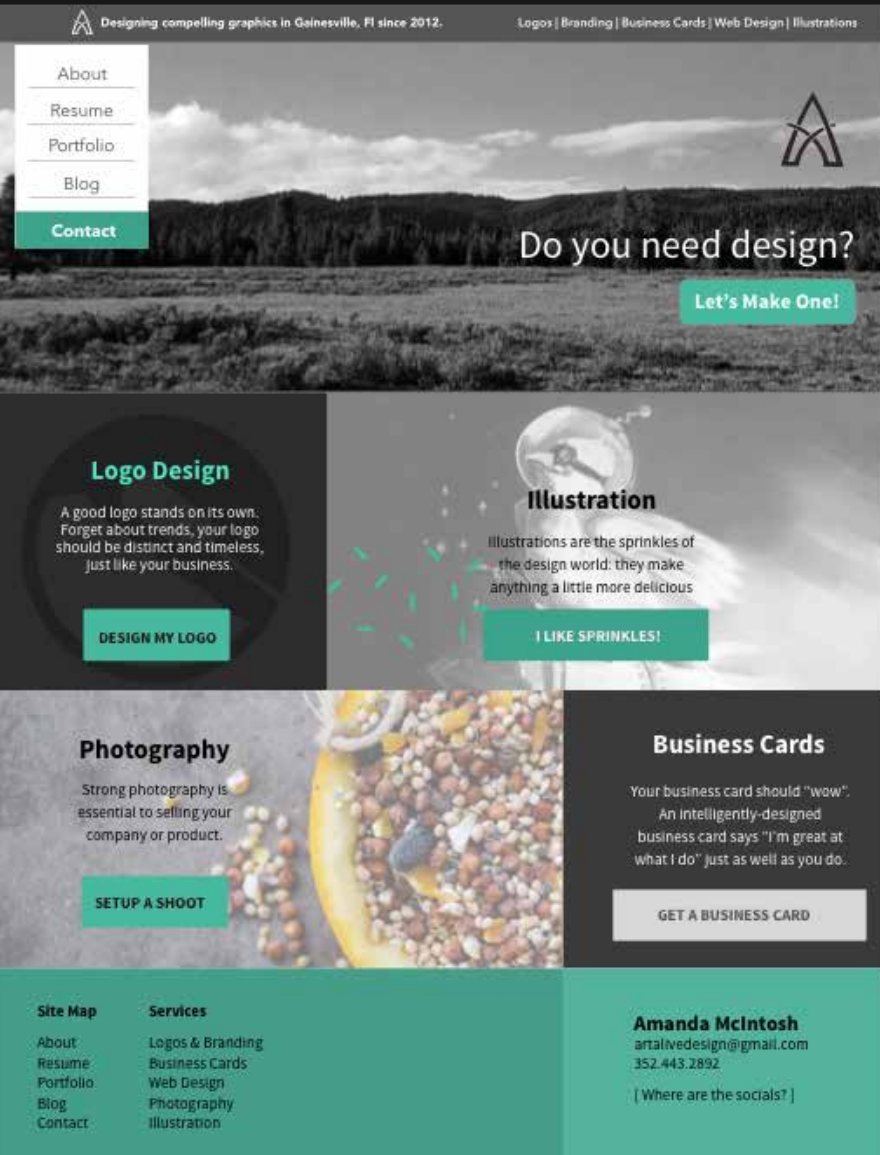

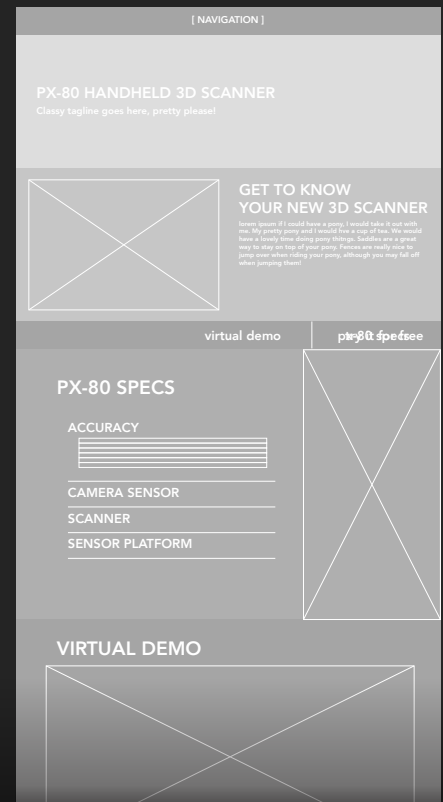

My puns are witty and my deadlines are met.

Last summer, I walked from Georgia to Maine.

WEB DESIGN

Design, wirefram and implementation

Creating intentional, purpose-driven design begins with planning. Wireframes and prototypes are essential foundations before a web project can move forward. Thanks to experience working at all steps in the process, I can confidently take a content outline from a wireframe to a finished site.

PARACOSM

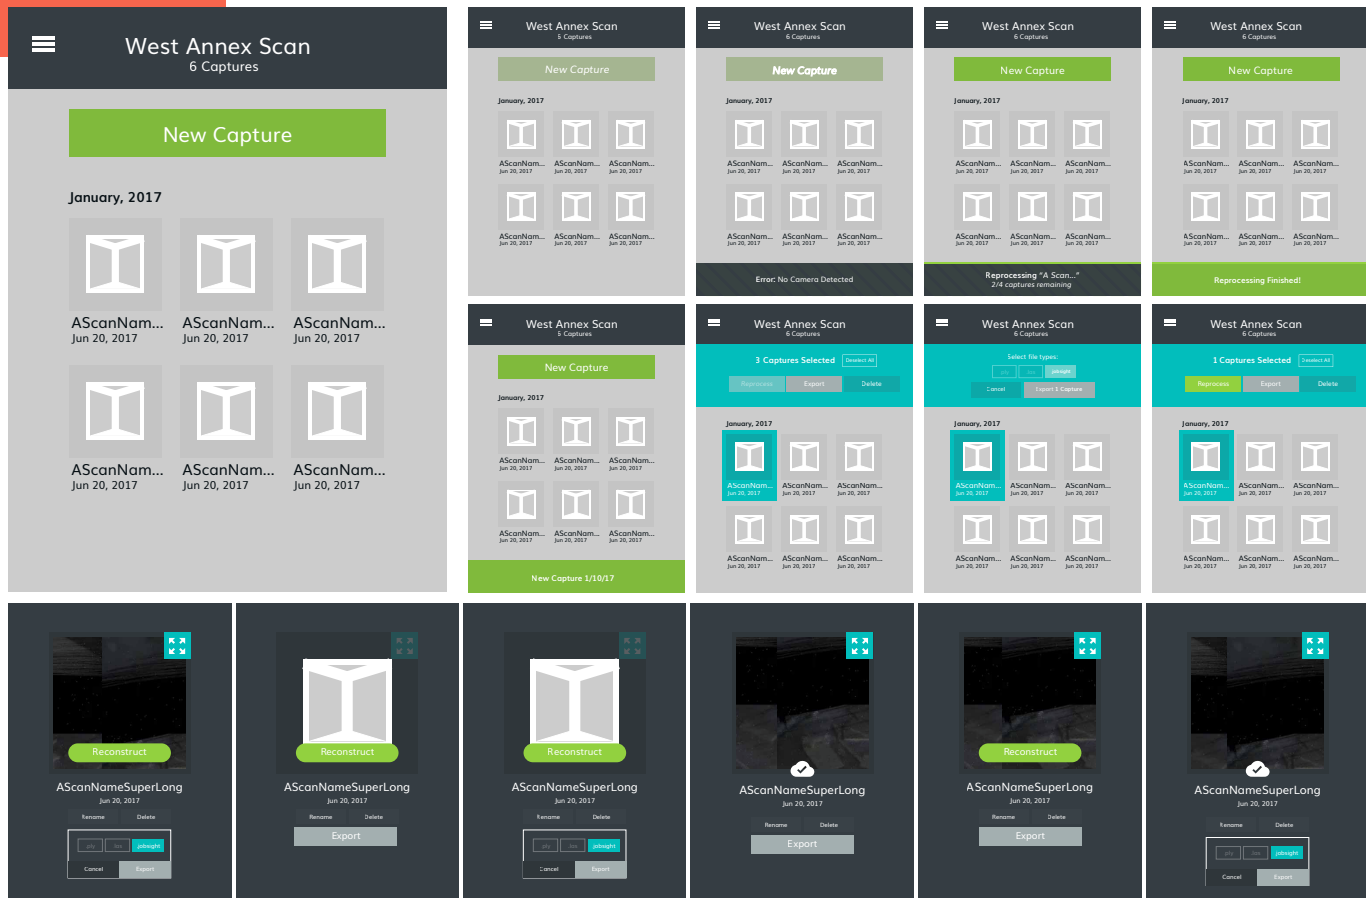

Web design, pitch decks, product mockups, and more...

Paracosm is a mid-sized tech start up with a small marketing team. My projects have ranged from pitch decks to product photography, from app development to conference brochures. Working at a small company has allowed me to work within marketing, and also collaborate with developers and programers.

Oct 2017

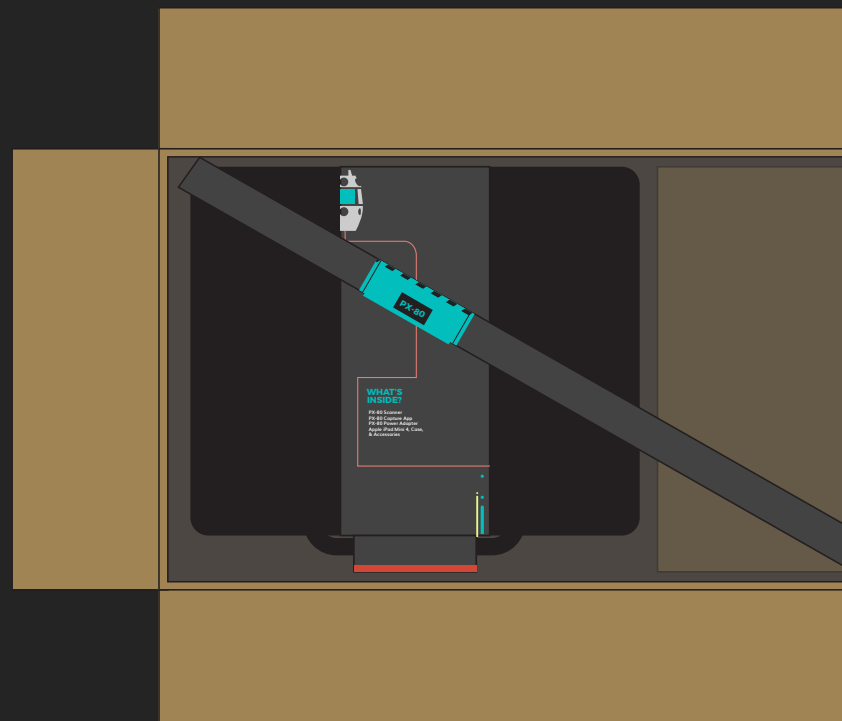

PX-80 App & Branding

I worked with the back end developer to conceptualize, wireframe, mock-up and finally, develop a mobile web-app using Javascript & HTML/CSS.

Packaging Collateral

In addition to the app, I worked with our head of marketing to design stickers and labels to go on product packaging.

Illustrations

I love digital illustration. I love capturing the whimsy and motion of the world around me. This painting of space explorer Budgie riding his ship got my my job at Paracosm, and now hangs in our conference room as a 3'x3' canvas print.

Jan 2017

Dallas Osborne Poster

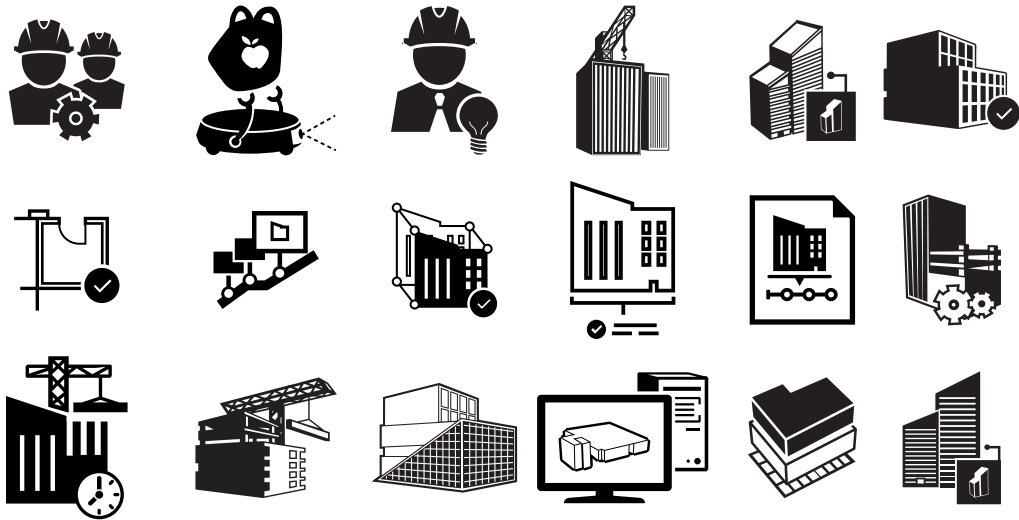

Charity work for our local 4-H club, this assignment was to create a poster promotion an annual trail ride. Finding the right balance of colors and texture to look good in a large-scale print was challenging, but the end result is the perfect balance between the two.

Feb 2017

Typography & Texture

This project was a quick, one-off design for a local church. I took this chance to practice creative typography, choosing to overlay a bold pattern over the simple-but-intriguing textures of the chalk board.
